-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Krasnik (US 4,195,379). The Krasnik bee device includes a frame 1 including a number of plastic, back-to-back boxes 2. Each box 2 has a honeycomb pattern embossed on its bottom 3. The grooves or spaces between each box and its neighbors are considered to constitute separation structures inasmuch as a blade or other thin object could be inserted therein to effect separation. As to claims 4, 5, two of the boxes within each frame are considered to constitute lids for the remaining two boxes (as seen in Figures 4, 5 of Krasnik), with elements 6, 7 at the box corners permitting them to be fastened together. With regard to claims 6, 8, 9, the widths of the side bars of the frame 1 are deemed to comprise spacing structures—raised buttons—that space the frames when in place within a hive. The backsides of the boxes 2 include attachment structures in the form of pins 4 and holes 5 for attaching adjacent backs together.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Krasnik. While the grooves between the boxes of Krasnik are continuous, use of discontinuous grooves—as by filling them partially with wax—would have been obvious to one skilled in the art in order to predictably make them more acceptable to the bees.

The patents to Madison (US 218,822), Long (US 1,580,513), Knox (US 2,023,959), and Paneli (US 2,146,844) have been cited to provide additional examples of beehive frames.
